Corrigenda

With regard to the article in the August 2019 issue entitled “EMSY expression affects multiple components of skin barrier with relevance to atopic dermatitis” (J Allergy Clin Immunol 2019; 144:470-81), the authors report that they have identified an error in the method that was used for plotting data in Fig 5, A. The correct method is as follows:

“A volcano plot was generated in R/ggplot2 using human proteins detected in all 4 of the replicates. The log2 ratio (log2 EMSY knockdown – log2 NT control) for each donor was calculated and averaged; P-values from paired t-test were derived from log10 transformed data and are unadjusted.” The corrected Fig 5, A is shown below; correction of this figure does not impact the results, conclusions, or interpretation of the paper.

With regard to the Letter to the Editor in the September 2019 issue entitled “Respiratory syncytial virus nonstructural protein 1 downregulates glucocorticoid receptor expression through miR-29a” (J Allergy Clin Immunol 2019;144:854-857), it has been brought to the editors’ attention that an affiliation was incorrect as printed for authors Leiqiong Gao, Shi Mo, Jun Xie, Sisi Chen, Xiang Wen, Xiaoru Long, and Luo Ren. Affiliation “a” for these authors should have read: The Pediatric Research Institute, Ministry of Education Key Laboratory of Child Development and Disorders, National Clinical Research Center for Child Health and Disorders, China International Science and Technology Cooperation base of Child development and Critical Disorders, Chongqing Key Laboratory of Child Infection and Immunity, Children’s Hospital of Chongqing Medical University, Chongqing, China. The authors regret the error.
